

Subject: Clarifying the feature you mentioned

Dear [Client's Name],

Thank you for reaching out and for sharing your feedback! I completely understand how helpful that feature would be for your workflow.

Currently,

Recruit CRM doesn't directly support inside the platform.

However, you can achieve a similar result using our Zapier integration, which connects Recruit CRM with LinkedIn or other email tools.

Many clients already use this setup to automate follow-ups smoothly.

I'll also share your suggestion with our product team, as they regularly review customer ideas for upcoming updates.

Please let me know if you'd like me to guide you through this workflow in a short call - I'd be happy to help!

Warm regards,

Ajeet Kumar

Customer Success Team / Recruit CRM
