

■ Interview Cheat Sheet — Ajeet Kumar

Next.js (Web Development)

- React-based framework for fast, SEO-friendly web apps.
- Key Features: Server-side rendering, file-based routing, API routes.

Command: `npx create-next-app myapp → npm run dev`

Example: `pages/index.js → export default function Home() { return Hello Next.js }`

Supabase (Backend & Auth)

- Open-source Firebase alternative using PostgreSQL.
- Provides Auth, Database, and File Storage.

Install: `npm install @supabase/supabase-js`

Example: `const supabase = createClient(URL, KEY) → supabase.from('users').insert([{ name: 'Ajeet' }])`

Flutter (Mobile App Development)

- Google's framework for Android, iOS, and Web apps using Dart.

Command: `flutter create myapp → flutter run`

Example: `MaterialApp(home: Scaffold(appBar: AppBar(title: Text('Hello'))))`

NLP (Natural Language Processing)

- Enables computers to understand human language.
- Common Uses: Chatbots, Sentiment Analysis, Summarization.

Python Example: `from transformers import pipeline → pipeline('sentiment-analysis')('I love AI!')`

Interview Tips

When asked about skills:

"I've used similar tools and can quickly learn Next.js, Supabase, and Flutter."

When asked joining date:

"I can join immediately or within 2 days — excited to contribute right away."

2-Day Prep Plan

Day 1	Next.js basics, connect Supabase
Day 2	Flutter UI + NLP sentiment model
